

. ° **Activity 1: “Split Screen School Supplies”**

Goal: Create two HTML files: one showing school supplies, and one showing class schedule. Use frames to display both in one view.

Steps:

1. Create **supplies.html** and **schedule.html**.
2. Create **index.html** with frameset to split the screen into two.

. ° **Activity 2: “History vs Today Webpage”**

Goal: Compare old web layout (frames) vs modern layout (CSS grids).

1. Create two versions of layout — one with frames (old) and modern CSS grid layout.
2. Students reflect on strengths/weaknesses of each.
